More eye contact. *Less keyboard.*

Your clinician uses Eluve, an ambient AI assistant, to write clinical notes during your visit, so they can look up from the screen and spend that time with you.

HIPAA SOC 2 Pursuing HITRUST

We're listening, so we can focus on you.

Ambient documentation. Private, secure, and always reviewed by your clinician.

You're in control. It's private and secure, and your clinician will always ask before using it. Prefer not to have Eluve in the room? Just let them know at the start of your visit.
